Extension for pruning shears

EP 22-38

Product user manual

-translation of the original instructions-

Dear user,

Thank you for choosing our product, we develop and manufacture high-quality products based on customer needs. Our products demonstrate excellent reliability in extreme working conditions. We also represent excellent quality in service. Our professional dealers are committed to answering questions and solving problems regarding the products. Thank you very much for your trust in us, we wish you a pleasant use!

Attention

Carefully read all warnings and safety instructions. Failure to comply may cause electric shocks, fires, or other serious injuries.

Environmental Protection Description

Conscientiously comply with the laws and regulations on waste disposal in the relevant countries. Electrical and electronic products cannot be disposed of together with household waste. The equipment, accessories, and packaging must be recyclable.

It is forbidden to randomly discard out-of-use machinery and equipment.

Carefully read all warnings and safety instructions. Failure to follow these instructions may cause electric shocks, fires, serious burns, and other accidents.

Do not use or expose the pruning shears to rain.

When using the electric shears, do not bring your hands near the cutting area to avoid injury.

When operating the pole, do not point it at anyone.

This product is a battery-powered telescopic pole for pruning shears, which is mainly used with the electric pruner with side attachment. It can be used within a height range of 5 m, which can effectively overcome the limitations of portable side-attachment shears, and at the same time, also improves pruning safety.

Technical specifications

MODEL	Compatible products	Materials	Size when closed	Full length size	Weight
EP 22-28	PS 22-38	Aluminum Tube	1.5M	2.2M	1.4KG

Installation steps:

After completing the installation, turn on the device, press the trigger twice, and follow the normal operating procedures for the shears. Make sure the machine is turned off before installing or removing shears/pruners.

Disassembly steps:

Use of the telescopic pole:

Make sure the telescopic pole is locked before using the extension.

Safety considerations

Warning! Please read all instructions carefully. Failure to observe them may cause electric shocks, fires, or other serious injuries!

Workplace Safety Instructions

1. Keep the workplace clean and well-lit; a messy and dark workplace can cause accidents.
2. Do not use electric shears in explosive, flammable, or damp environments.
3. Keep children and others away before operating the electric shears normally, to avoid accidental injuries caused by distractions during operation.

Electrical Safety Instructions

1. The battery socket of the power tool must match the end of the battery connection, and the socket and plug must not be modified in any way.
2. The power tool must not be exposed to rain or moisture. The penetration of water or other liquids will increase the risk of electric shock and electrical damage.
3. Do not misuse the cable, do not use the cable to lift, pull the power tool, or unplug it; keep the power tool away from heat, oil, sharp edges, or moving parts, and do not use the charger if the cable or plug is damaged. A twisted or damaged cable increases the risk of electric shock.

Personal Safety Instructions

1. Pay attention to the operation of the power tool and stay alert while using it. Do not operate when tired, under the influence of medication or alcohol; distraction during operation can cause serious personal injury.
2. Use safety protection devices, always wear goggles, etc. in appropriate conditions; dust masks, non-slip safety shoes, safety helmets, hearing protection devices, etc., can reduce personal injuries.
3. Before connecting the power tool, remove all wrenches or adjustment keys left on the rotating part of the device itself, as they can cause personal injury.
4. During operation, do not overreach, keep your hands away from the work area, never touch the material for any reason, and ensure that any material or surface under the work area is not damaged. Always pay attention to the balance of your feet and body so you can control the power tool in unexpected situations.
5. Dress appropriately, do not wear loose clothing or accessories, keep hair, clothes, and sleeves away from moving parts. Loose clothing, accessories, or long hair could be caught in moving parts.

Abnormal situations and how to deal with them

1. If a non-cuttable object is accidentally inserted into the tool, immediately release the trigger and the blade will automatically return to the open position.
2. When the branch to be cut is too hard, the trigger should be released in time and the blade will automatically return to the open position.
3. If you encounter problems charging the battery, first check if the charger is the one provided with the product, then check that the charging voltage matches the voltage on the label.
4. In case of electrical or mechanical failure, immediately turn off the switch.
5. If the instructions for use are not followed, the battery may spray liquid; do not touch this liquid. In case of accidental contact, wash immediately with water. If the liquid gets into your eyes, in addition to washing with water, you should go to the hospital. The liquid sprayed from the battery can cause irritation or burns.

After-sales service

If you have any questions during use, do not hesitate to contact us promptly. Our specialized staff is available to answer your questions and solve any problems. Make sure that maintenance is carried out by qualified technicians, using only original and compatible spare parts, to ensure the safety and reliability of the machine.

Declaration

The company reserves the right to make technical improvements to the products described in this manual. Any changes may occur without notice. In case of discrepancies between illustrations, images, or descriptions in this manual and the actual product, always refer to the characteristics of the physical object as the main standard. Thank you for your understanding.
